

Uniplex 711TM-E **TRIS (7- 9 –11) TRIMELLITATE**

Uniplex 711TM-E is an excellent low volatility plasticizer for polyvinyl chloride. It is particularly recommended for use in PVC wire and cable applications and automotive molding applications. PVC formulations plasticized with Uniplex 711TM-E have excellent low temperature properties. This plasticizer contains 0.25 weight percent Topanol CA.

SPECIFICATIONS:

Appearance	Clear liquid, free of foreign material
Odor	Mild, characteristic
Assay	99.0% minimum
Acid Value	0.2 mg KOH/gm
Color, APHA	200 maximum
Water Content, wt. %	0.1 maximum
