DNHP

Di-N-Hexyl Phthalate

CAS: 84-75-3

DNHP is a high performance plasticizer useful in polyvinyl chloride (PVC) for the applications in the industry of automotive, building & construction material, cable, and flooring.

Product Specifications

Appearance	Clear liquid with no foreign matter
Acid No., mgKOH/g	0.07 Maximum
Color, Pt-Co	25 Maximum
Ester Content, %	99.6 Minimum
Water Content, wt. %	0.1 Maximum
Specific Gravity, 25/25°C	1.000 – 1.006
Refractive Index, 25°C	1.485 typical
Viscosity, dynamic, 25°C, cP	22 typical

HANDLING

Refer to Material Safety Data Sheet

These suggestions and data are based on information we believe to be reliable. They are offered in good faith, but without guarantee, as conditions and methods of use of our products are beyond our control. We recommend that the prospective user determine the suitability of our materials and suggestions before adopting them on a commercial scale. Suggestions for uses of our products should not be understood as recommendations that they be used in violation of any patents.
